PANSY HENDERSON'S MAMMOTH BUTTERFLY

This "Butterfly" race originated with Mr. Peter Henderson—who was particularly fond of pansies and could be seen almost any morning during "pansy season" walking around the beds—and through his pansy trials from the best American, English, Scotch, French and German pansy specialists. A boy with trowel and "flat" followed and lifted any plant indicated by Mr. Henderson—which meant that it fulfilled all of his expert and critical requirements and was to be transferred to the "Butterfly" bed and associate with the "quality" pansies—the best from all over the world. This process of selection and elimination has been persisted in by us ever since, and from the legion of "most beautiful" pansies among Henderson's Butterflies we have chosen this offering.

Henderson's Mammoth Butterfly Pansies in Mixed Colors.
Pkt., 15c.; Per 1,000 seeds, 50c.; Per oz., \$6.00

PRIMROSE

(Giant Fringed Chinese)

(*Primula Sinensis Grandiflora Fimbriata*)

Chinese Primroses are among our finest winter and spring blooming pot plants; of healthy, sturdy growth, 8 to 12 inches high, and free from insects; while they produce for weeks large trusses of flowers, which, in our new Giant varieties, average $4\frac{1}{2}$ to 6 inches in circumference.

Giant, Double, Mixed Colors.
Pkt., 50c.; 100 seeds, 75c.
Giant, Single, Mixed Colors.
Pkt., 25c.; 250 seeds, \$1.00

PRIMULA OBCONICA GIGANTEA

These "Ever-flowering Primroses" are favorite pot plants for house and conservatory. Many of the flowers measure $1\frac{1}{2}$ inches across, equaling in dimensions those of their Chinese rivals, with the added merit of being easier grown and having a longer duration of bloom. Several colors in mixture, white, crimson, rose, violet, lilac, pink-eyed sorts, etc. Pkt., 25c. 1000 seeds, etc. Pkt., \$1.00.

PRIMULA MALACOIDES

This new race of Primroses from the mountains of China has proven most profuse-flowering for pot culture. The plants form rosettes of light green leaves from which numerous wiry stems—8 to 10 inches in height—gracefully carry whorls of flowers $\frac{1}{2}$ to $\frac{3}{4}$ of an inch across. They are easily grown from seed and commence flowering in about 4 months from sowing and continue to bloom in increasing

profusion for many weeks. A cool situation indoors or in the conservatory suits them to perfection.

P. *Malacoides* Alba. Pure white flowers.

Pkt., 25c.; 1,000 seeds, \$1.00

P. *Malacoides*. Lilac-colored flowers.

Pkt., 25c.; 1,000 seeds, \$1.00

New Giant EARLY FLOWERING Spencer Sweet Peas

BLOOM 4 WEEKS EARLIER THAN THE LATE SPENCERS

The plants of this new race, grown under congenial conditions, are of strong constitution, vigorous growth, profuse and bloom continuously for about four months. Grown in the open ground they begin flowering in about 106 days from seed sowing or fully four weeks sooner than late flowering Sweet Peas sown at the same time, and they continue to flower in profusion for fully 4 months. It is predicted by Sweet Pea authorities that this race will supplant all other early and late flowering Sweet Peas for winter flowering under glass, and also for open ground culture in our Southern States—sown preferably in fall or winter.

The Giant Waved Spencer or Orchid Flowered Sweet Peas

STANDARD VARIETIES AND NOVELTIES

The characteristics of the Spencer Sweet Peas, grown under congenial conditions are: robust growth, the plants attaining a height of from 6 to 10 feet, requiring for full development to be not less than 6 inches apart; a foot apart is better. The flowers are giants among Sweet Peas, measuring 2 to 2½ inches across. They are beautifully formed and daintily waved. Three and often four or five of these queenly blossoms are borne on long, strong stems.

Henderson's Packet of Named Sweet Peas contain 40 to 50 seeds.

HENDERSON'S SUPERIOR SEEDS

FAMOUS THE WORLD OVER FOR THREE-QUARTERS OF A CENTURY

We Make a Specialty of Select Strains for Market Gardeners and Truck Farmers

REFUGEE or 1000 to 1 BEAN

**The Best Dwarf Late,
Green-Podded Snap Bean**

A very popular market gardener's variety on account of its exceeding productiveness. It is extensively grown for a fall crop in both the north and south. The plants are strong, healthy, and robust, about 15 inches high, branching and bushy in growth. This bean is the most popular of all in the markets of large cities and is extensively used for pickling. Our strain is very fine, and will be found free from flat pods. (See engraving)

Price, 40c. qt., \$2.75 pk., \$10.00 bush.

ECLIPSE BEET

One of the best to follow after the very early sorts. When young it may be bunched, but it is also used as a basket beet, and is known and sells freely on every market. It is medium in size, the tops small for size of root, the outer color is dark and the flesh strongly ringed in two shades of red. Price, 10c. oz., 25c. $\frac{1}{4}$ lb., 80c. lb.

Henderson's SUCCESSION GABBAGE

The Most Dependable Cabbage Grown

**ABSOLUTELY PERFECT IN EVERY RESPECT
FOR EITHER SUMMER OR WINTER USE
THE MOST RELIABLE CABBAGE EVER RAISED**

HENDERSON'S SUCCESSION CABBAGE we consider one of our most valuable contributions to horticulture. It may be classed as a second early variety, coming in a few days later than Early Summer, but it is immeasurably superior to that variety; it is nearly double the size and is absolutely true to its type under all conditions. In addition to this, it has no tendency whatever to run to seed under normal conditions. We can say without exaggeration that *it is the finest cabbage in existence* today; whether for medium early, main crop or late use it has no equal. It is so finely bred and so true to type that in a field of twenty acres every head appears alike.

We can recommend it either for the market gardener, trucker or private planter, as it is a perfect cabbage in every respect, not only being of the largest size, but of handsome color and of the finest quality. Our stocks of cabbage of all varieties have for years been the *acknowledged standard of excellence in this country*, and when we state that we consider **Succession** to be the most valuable variety that we have ever introduced our opinion of its great merit will be apparent to all. (See engraving.)

Prices, 65c. oz., \$2.25 $\frac{1}{4}$ lb., \$8.00 lb.

If your seed order amounts to ten dollars or more and at least half the value is in small seeds we will pay the delivery charges to any freight, express, or post office in the United States (see page 2 of cover)

HENDERSON'S CHARLESTON or LARGE WAKEFIELD

The Best Large Early Cabbage

Several years ago, our customers requested us to procure for them, if possible, a Cabbage which had all the characteristics of the Early Jersey Wakefield, but of greater size. With this in view, we carefully selected from one of our best stocks of Wakefield a larger type, which is so fixed in its character that it is now largely grown by those desiring a Cabbage of this kind. This selection will average about 50 per cent larger in size than the old type of Wakefield, and is only a few days later. Price, 55c. oz., \$1.75 $\frac{1}{4}$ lb., \$6.00 lb.

HENDERSON'S SNOWBALL CAULIFLOWER

Planters in Every Clime Grow Henderson's Snowball Cauliflower
And receive topmost prices for the product.

No seed crop is grown with greater care than Henderson's Snowball Cauliflower. The result has been just as satisfactory to us as to our customers, as during our entire experience, it has never failed to come up to its high standard nor have we ever received a well founded complaint regarding the quality of the stock. On the contrary, we are continually receiving letters testifying to its general excellence.

The constant and ever increasing demand for our own genuine stock, coming from the largest and most successful growers clearly demonstrates its superiority over all others. (See engraving.) Price, 25c. pkt., \$3.25 oz., \$12.00 $\frac{1}{4}$ lb., \$45.00 lb.

HENDERSON'S BIG BOSTON LETTUCE

A Grand Large Cabbage Lettuce—For either Early Summer or Fall Use

This grand variety, introduced into cultivation by us several years ago, has proved to be most valuable, steadily gaining in popularity until it is now more extensively grown than any other kind of lettuce, either for the private table or for sale, North, South, East or West; whether grown in the open ground for summer and fall use, or in frames for spring, or forced cool in greenhouse for

winter use, it invariably gives both grower and user the utmost satisfaction, producing during all seasons, under ordinarily favorable conditions, splendid, large, buttery-yellow heads, packed with thoroughly blanched leaves, crisp, tender and sweet, delighting both the palate and the eye. This grand variety makes a handsome plant, with but few outside leaves, and stands long before bolting to seed. Although Big Boston is one of our best large-heading midsummer lettuces, it is also peculiarly adapted for late Fall culture; large areas of it may be seen in the vicinity of New York as late as Nov. 15th; a slight covering of salt marsh hay amply protects the plants from hard frosts, and when cut for market the leaves are as fresh, bright and untinged as in midsummer. Thousands of acres of it are grown during the winter in Florida and other Southern States for shipping to Northern markets. As far north as Maine it is a wonderfully popular summer lettuce. (See engraving.)

Price, 20c. oz., 55c. $\frac{1}{4}$ lb., \$1.60 lb., 10 lbs. and upwards, \$1.60 lb.

BEWARE OF IMITATIONS. We have always controlled Henderson's Snowball Cauliflower, any statement to the contrary notwithstanding, and unless the seed is bought directly from us do not get the genuine, as we do not supply it to dealers.

HENDERSON'S SUPERIOR SEEDS

FAMOUS THE WORLD OVER FOR THREE-QUARTERS OF A CENTURY

Seeds are offered by competitors as Henderson's Snowball Cauliflower, Henderson's Succession and Henderson's Charleston Wakefield Cabbage, Henderson's Big Boston Lettuce, Henderson's Easy Blanching Celery, Henderson's White Spine Cucumber, Henderson's Ponderosa Tomato and other varieties of vegetables introduced by us. The name of "Henderson" preceding the varietal name would indicate that the stock is ours; but such is not the case, as WE DO NOT SELL TO DEALERS.

Upwards of 20 years ago we discontinued selling to dealers to sell again. This drastic step was taken because we had become con-

vinced that such a measure was necessary in the interests of our customers, especially of those who made their living by growing for the market. Our long experience as market gardeners and florists impressed upon us the fact that quality should be supreme, that price was secondary. The jobber in seeds naturally considers price as paramount, hence there is a dangerous tendency to sacrifice quality by cheapening production.

If you want our seeds the only way to get them is to send the order direct to Pete Henderson & Co. and get the seeds in our own bags, with our own label on them.

The "HENDERSON" Perfected Lawn Mowers

Two New Styles Offered for 1922

MODEL "A" and MODEL "B"

Self Adjusting
Ball Bearings.
Drawcut
Wiping Cyl-
inder. Flexi-
Rigid, Twin-
Edge, Self
Sharpening
Cutting Knife

The Henderson Lawn Mower, as formerly constructed had, with a few exceptions, left nothing to be desired to make it an absolutely perfect grass cutting machine, adapted to doing all kinds of work; these two lacking essentials we are now supplying in the Henderson Perfected Lawn Mowers, Model A and Model B. We are offering these two models so that our customers may select a Henderson Mower best adapted to their needs.

These new models are fitted with a new pattern cutting knife of flexi-rigid construction that will absolutely cure nine-tenths of the ills that afflict Lawn Mowers in general. This cutting knife is flexible to a predetermined degree and then becomes positively rigid and immovable. Having two cutting edges it gives double service through which not a spear of grass escapes. The flexible member of this knife permits the most unskilled to secure an adjustment of the cutting knife to the spiral blades so that it will cut the grass as perfectly, and as easily, as if adjusted by an expert.

This new cutting knife has been tested out the past season under the most severe and trying conditions, and by its use in both models of the Henderson Perfected Lawn Mower, combined with self adjusting ball bearings and drawcut spiral wiping blades, it makes a perfect Lawn Mower; a Mower we offer with an absolute unconditional guarantee to give perfect satisfaction.

Specifications of Model "A"

(See engraving.)

Henderson's Border and Terrace Mower

Especially designed to cut the grass on borders—the narrow strips of sod sometimes only a few inches wide—between flower beds and walks where a side-wheel mower would have one wheel down in the gutter and in consequence the mower would cut into the sod. In our Border Mower a large light cylinder extends the full width of the mower and keeps the machine level with the surface and does perfect work. This machine is also useful for regular lawn work. It is very light running, and will give thorough satisfaction.

No catchers can be supplied for this mower.

BIRD NETTING.

To Protect Fruits, Vegetables, Etc.

What is more exasperating than to anticipate a liberal picking of some fruit to find when you reach the garden that your bird neighbors have been there before you, and consumed or destroyed the ripest and choicest berries, grapes or cherries, which some birds are voraciously fond of. Lettuce and peas are often ravaged by birds, even flowers are not immune from their attacks, and they reveal among some plants' ripening seeds. All this may be obviated by shutting the bird out with bird netting. This is a quality cotton netting of 1 inch mesh and comes in 20 foot and 30 foot widths and of any reasonable length. Price, \$1.50 per 100 sq. ft.; P. P. 1 lb.

The "Success" Knapsack Sprayer AND BUCKET SPRAYER COMBINED

This valuable Sprayer is used for applying Bordeaux Mixture and other fluid remedies in a mist-like spray, for the treatment, prevention and cure of mildew, black rot, potato blight and kindred diseases; with it a man can spray five to six acres of vines in a day. The working parts are made entirely of brass, and the chemicals will not corrode or rust them. The air chamber keeps up a steady pressure, so a continuous discharge is given. The Pump may be worked with either the right or left hand. The drip cup is just below the air chamber, and is made extra wide, so that any leakage around the plunger is returned into the tank and not allowed to run down the operator's back. An attachment is furnished for under-spraying. This sprayer may be used either as a knapsack or bucket sprayer. Price Complete: Brass Tank, \$23.00; Galvanized Tank, \$17.50.

Henderson's "Fruitall" Spray Pump.

For spraying fruit, ornamental and shade trees, vines, grapes, etc.

It has all working parts of brass, and can be mounted on or removed from barrel or tank by the simple adjustment of two thumb-screws. The pump is easily operated by a single person. The Paddle Agitator is mechanical in its action and much superior to the old method of "return discharge."

Prices (For Barrels and Truck, see above).

THE

"HENDERSON" LAWN GRASS SEED.

PRODUCES ENDURING TURF THAT WITHSTANDS SUMMER DROUGHTS.

When sown in the Fall, the best time being the latter part of August or the early part of September the benefits of a warm soil copious rainfall and lessening temperature are to be had. These conditions insure a better germination, a higher percentage of the survival of the grasses which start into growth, and a stronger and healthier growth. Because of these conditions the crop of weeds which always appears in freshly cultivated land will be lighter.

The "Henderson" Lawn Grass Seed is composed of fine-leaved dwarf Grasses, which produce closely interwoven, deep elastic turf that maintains from year to year lawns of enduring green. This continuous covering of verdure is obtained by including in the mixture Grasses which arrive at their best during the different months of the year, one variety constantly succeeding another. It is impossible to make an enduring lawn by sowing seeds of a single variety which will only grow vigorously during a portion of the year. Kentucky Blue Grass, for instance—which is sometimes recommended for lawns—grows but sparsely during midsummer, besides losing color during hot weather, when it becomes a pale yellowish green. The smooth and velvety sward produced by The "Henderson" Lawn Grass Seed remains at all times a dark green, rich and luxuriant.

The "Henderson" Lawn Grass is in reality as cheap as any other, notwithstanding its superior quality. For while many mixtures on the market weigh only 14 lbs. to the bushel, The "Henderson" Lawn Grass Seed weighs 20 lbs. per measured bushel, being entirely free from chaff and other foreign matter. *Full instructions in every bag and package.*

Prices, 35c. quart, \$1.25 for 4 quarts, \$2.00 peck, \$7.00 bushel of 20 lbs.
